

# SimSpray Hygiene and Disinfectant Guidelines:

Use an EPA-approved **disinfectant** compatible with plastic, metal, and glass surfaces. Follow the label directions. Do not soak or submerge SimSpray or any components. Avoid abrasive cleaning solutions.

## Practice Good Hygiene Before and After Use:

## Disinfect Common Surfaces:

Disinfectants with a high alcohol percent may damage your devices. VRSim recommends Lysol or Clorox disinfectant wipes for effective cleaning. Do not use hand sanitizer on SimSpray.

## Use Disposable Hygiene Covers:

Need additional hygiene covers? VRSim uses "Universal Disposable Hygiene Covers" from [vrcover.com](http://vrcover.com)
